Walk Days

Start by getting into the habit of walking regularly, mix long walks with short walks. Try increasing your speed just a little each time you do a short walk. Try interval training, walking fast and slow to increase stamina.

Other activities

Try other activities to help increase your stamina and fitness such as swimming, dancing, spin, kick boxing or pilates. Enjoyment is the deciding factor! Start off with 15 minutes and build up your time. Choose whatever you enjoy, but make sure you always increase your heart rate.

Rest days

Take a rest from aerobic activity but spend 5-10 minutes a day having a good stretch. The more you do the more you will notice a difference in your walking and flexibility.
